

Azhar Ud Din

Senior Software Engineer (.Net)

(+92)345-0229998
azharmir526@gmail.com
I9-1 Islamabad

Summary

A proactive and fast-learning individual seeking opportunities for professional growth. With 4 years of experience in ASP.NET Core, I am highly proficient in C#, .NET Core, and Angular. I excel in both team settings and independent projects, delivering robust software solutions that align with organizational goals and values.

Skills

Object Oriented Programming • Design Patterns • Code versioning tools (GIT, TFS, SVN, Azure DevOps) • Issue Tracking (Jira, ClickUp) • Web Development • Microsoft SQL Server • SSO (Single Sign-On) and SLO (Single Logout) • Entity Framework (EF Core) • C# • ASP.NET Core • Angular 13 (and above) • Typescript • HTML, CSS, JavaScript, jQuery and API's • SQL • Web Services (REST) • Cloud Platforms (Azure, AWS) • Unit Testing • Performance Optimization • Technical Documentation • Medical Billing EDI Development

Experience

CareCloud

Senior Software Engineer (ASP.Net Core & Angular) July 2024 - Present

Working on reporting and analytics project with C# and Typescript.

- Leading the design, development, and maintenance of software using state-of-the-art tools and techniques.
- Collaborating with cross-functional teams to define and implement new features.
- Ensuring compliance with project plans and industry standards.

Software Engineer (ASP.Net Core & Angular) Mar 2023 – June 2024

- Design, develop and maintain Software's using state of the art tools and techniques.
- Perform Unit testing and debugging.
- Comply with project plans and industry standards.

Technologies:

- Typescript with Angular 13
- C# with .NET Core (MVC & Web API) 5 and above
- Entity Framework 6
- REST API
- MSSQL DB

PrecisionBI, healthcare analytics and business intelligence platform. The solution is built with Angular 13(Front End) and ASP.Net Core 5 (Backend), it is using micro services architecture, SSO (Single Sign-On) and MSSQL

BellMedex

Software Engineer (ASP.Net Core) June 2021 – Feb 2023

Built a clearing house application for claim processing and worked with a practice management system to develop web API.

- Built 'FusionEDI', a clearing house for medical claim processing.
- Built a .Net API to manipulate (read, update, delete, and add) PDF files, text files, and folders on a specific server.

- Worked as an EDI Developer with these files: 837, 835, 277, 276, 270, and 271.
- Created business logic for EDI.
- Worked on SQL queries, stored procedures, views, and triggers.
- Created and tested .Net APIs.

Technologies:

- C# .Net Core 5 (Web API) and above
- Entity Framework 6
- MSSQL DB
- RESTful Web APIs with JWT Authentication
- Repository Pattern as Dependency Injections
- Swagger for API documentation
- SeriLog for error logging
- Hangfire for scheduled tasks

IPSEC & IT

Intern .Net Developer (ASP.Net & Web Forms) C#

Sep 2020 - Nov 2020

Key responsibilities:

- Developing C# Windows Desktop applications.
- Coordinate with the Project Manager on current programming tasks.
- Collaborate with other programmers to design and implement features.
- Quickly producing well-organized, optimized, and documented source code.
- Debugging existing source code and polished feature sets.

BH Software Solution

Jr. Front End Developer

Sep 2019 – Feb 2020

My responsibilities were:

- Bringing mock-ups to life using HTML, CSS, and JavaScript.

Education

University of Azad Jammu and Kashmir

Bachelor's degree, Computer Software Engineering
